#3

Amphetamine Overdose ED visits are 2x CA's rate

Amphetamines stimulate the central nervous system. Examples of amphetamines include Adderall and Dexedrine, along with illicit amphetamines like methamphetamine and ecstasy.

There *are* solutions.

Hope Rising Lake County and its partners recognize addiction as a disease. We will make it our mission to **work tirelessly to eliminate the stigma associated with addiction** from opioid use and other illicit substances. Through education, treatment and outreach, we aim to support our community members experiencing addiction, encouraging them to **live their best lives.**
